10 Chapters

10.1 Introduction

10.1.1 Background

10.1.2 Problem Statement

Going on a long distance journey is difficult in Kenya if you do not own a car. The public means of transport are inconvenient and unreliable. During holidays, most people are stranded as the prices are hicked, as the demands exceeds the supply. Apart from the Matatus most people prefer to hire cars. It is expensive because they end up hiring the car for the days they will be away.

This is a big problem to the youths since most of them do not own cars and cannot afford to hire cars.

10.1.3 Objectives

Develop a distributed system that will help solve this problem :-

1. Connect Drivers and Riders using the system

2. Onboard a car owner to offer services

3. Drivers to post about their trips

10.1.4 Justification

10.1.5 Scope

10.1.6 Constraints

10.2 Literature Review

10.3 Research and Methodology

10.4 Results and Discussion

10.5 Conclusion and Recommendations
